ABSTRACT

The 45 tests in this bibliography cover a wide span of age and grade levels. In addition to tests which assess various library skills, there are also measures that evaluate study skills such as using maps, charts, tables, and graphs. Some of the measures are part of an achievement battery. Each test citation may include the following data elements: AN (a six-digit identification number assigned by the Test Collection); TI (name of the instrument); DT (components within the overall test that assess particular skills or factors); AU (personal or institutional author); YR (year in which the test was published or copyrighted); AV (test publisher or distributor); GL (list of grades for which the test is suitable); TG (list of ages for which the test is suitable); and AB (a description of the test and its purpose). INTRODUCTION

Scope of Bibliography

The tests in this bibliography cover a wide span of age and grade levels. In addition to tests which assess various library skills, there are also measures that evaluate study skills, such as using maps, charts, tables, and graphs. Some of the measures are part of an achievement battery.

Availability

Copies of the tests described on the following pages must be obtained directly from the publisher, as stated in the AV AVAILABILITY section of each test citation. Generally, the Test Collection does not have distribution rights for its holdings. However, in special instances, the Test Collection has been granted permission from individual authors to distribute their tests, which are primarily research instruments. The AV AVAILABILITY information for these instruments will be Tests in Microfiche, Test Collection, Educational Testing Service, Princeton, NJ 08541.

Guide to Citation Elements

The following is a guide to the various elements which may be present in a test citation:

AN - Six-digit identification number assigned by the Test Collection

TI - Name of the instrument

DT - Components within the overall test which assess particular skills or factors

AU - Personal or institutional author

YR - Year test was published or copyrighted

AV - Test publisher or distributor; the organization which sells or distributes the instrument

AB ABSTRACT: This achievement test for use at the high school level is designed to measure those broad skills considered fundamental to the goals of secondary education, regardless of course or curriculum content. Some skills measured are ability to recognize correct use of standard American English, mathematical reasoning in daily life, analytical thinking skills in social studies context, general scientific understanding and interpretation, interpretation of literary materials, knowledge of common words, competency in using sources of information. Scores are reported for each subtest. A total reading score is derived. Scores typically reported for major achievement batteries, such as stanines, percentiles etc. are also available. Parallel forms are available.

AB ABSTRACT: Provides examiners with an estimate of a student's knowledge of information commonly taught in the schools. The test has four purposes: to identify students below their peers in the content areas of reading, writing, mathematics, science, social studies and reference skills; to identify individual students' strengths and weaknesses; to document students' progress as a result of intervention programs; and to use as a measurement tool in research studies.

AB ABSTRACT: One of three test batteries that comprise the Basic Skills Assessment Program, a comprehensive, standardized testing program designed to assess student achievement and abilities. The Iowa Tests of Basic Skills (ITBS) were developed to assess student progress in the basic skills. Assesses readiness and achievement in the basic skills and content areas appropriate to the grade covered. Behavioral objectives to which test items at each level are written coordinate with those of state and local courses of study and instructional materials and methods. The early primary battery consists of five subtests at level 5 and six subtests at level 6. All level 5 and 6 tests, except reading, are untimed and are orally administered. Levels 7 and 8 of the primary battery and levels 9 through 14 of the multilevel edition are available in either a basic battery or a complete battery. The basic battery has fewer tests than the complete battery and is ideal for use when testing time is limited. For the multilevel edition, a supplementary social studies/science test booklet is also available. For levels 9-14, separate test booklets for each level are also available and each

separate level booklet contains all 11 subtests of the complete battery plus the social studies and science tests. Optional writing and listening tests are also available for levels 9-14. The number of items for all subtests and time required to complete the batteries are: level 5 (157 items, 125-170 minutes); level 6 (225 items, 125-170 minutes); level 7 (316 items basic, 204 minutes; 539 items complete, 297 minutes); level 8 (345 items basic, 204 minutes; 613 items complete, 297 minutes); level 9 (302 items basic, 285 minutes; 457 items complete, 406 minutes); level 10 (334 items basic, 285 minutes; 503 items complete, 406 minutes); level 11 (357 items basic, 285 minutes; 538 items complete, 406 minutes); level 12 (376 items basic, 285 minutes; 560 items complete, 406 minutes); level 13 (385 items basic, 285 minutes; 581 items complete, 406 minutes); level 14 (390 items basic, 285 minutes; 591 items complete, 406 minutes). The Iowa Tests of Basic Skills, the Cognitive Abilities Test, and the Tests of Achievement and Proficiency were normed concurrently.

AB ABSTRACT: A battery of norm-referenced, standardized tests in basic curriculum areas for grades K-12. Designed to survey students' general academic achievement. Contents of tests are based on learner objectives most commonly taught in the United States. Two forms are available, forms P and Q. An optional test to include with the achievement battery is the Educational Ability Series (EAS) which provides an estimate of general learning ability for students in grades K-12. The EAS assesses those factors most closely

associated with overall academic performance, such as verbal, numerical, and reasoning abilities. Test administrators may decide to do out-of-level testing with the Survey of Basic Skills for special groups of students, such as Chapter I, special education, gifted or high-achieving students. Levels 34 through 37 are multilevel tests designed for use from the spring of grade 4 through high school. The reference materials, social studies, and science subtests are optional.

AB ABSTRACT: An instrument which can be used to measure the school library/media ability of students. The test covers five broad areas: 1) how things are organized, 2) the skills needed to select appropriate resources, 3) the skills needed to use each resource, 4) the skills needed to comprehend the information given, and 5) the skills needed to present the information in a meaningful way to others. The test can be used for diagnosing areas where students need library instruction, as a pre-post test to determine effectiveness of library instruction, and to correlate studies between library/media skills and academic achievement. An alternate for the test is Dr. Anne M. Hyland, 236 E. Clearview, Worthington, OH 43085.

AB ABSTRACT: Criterion-referenced test which measures the major components of the reading process. Designed to indicate whether a student has mastered specific skills. Primary purpose of test is to diagnose student strengths and weaknesses in reading. Test assesses student mastery of specific instructional objectives and contains features which meet federal and most state guidelines for tests used in Title I project evaluations. There is a reading rate test within the comprehension section of levels 11-14, as well as an eyesight check in levels 10-14. The eyesight check is not intended as a substitute for a school's vision screening program.

AB ABSTRACT: Part of a series which provides for comprehensive and continuous assessment of student progress in widely accepted secondary school goals in basic skills and basic curricular areas. Tests emphasize skills and ability to use information rather than being content specific. In addition to the four subtest scores, there is an applied proficiency skills score, based on test items which reflect types of out-of-school tasks necessary for functioning in society. Score on these items reflects how effectively students can apply practical skills in reading, mathematics, written expression and finding and interpreting information.

GL GRADE LEVEL: K; 1; 2; 3.
AB ABSTRACT: Primary battery is the beginning of a series of tests which provide for continuous measurement of achievement from kindergarten through high school. Measures growth in fundamental skills necessary for learning activities. In levels 5 and 6, emphasis is on readiness skills. The number of subtests for levels 5-8 varies from 5 to 13, depending on level being used. Test battery is given in five sessions and takes from 115 to 235 minutes, depending on level being administered. Four levels in primary battery allow choice of test which is appropriate for students' developmental levels. Tests were normed concurrently with Canadian Cognitive Abilities Tests. Tests assess following skills: listening, word analysis, vocabularly, reading, oral language, written language, work study skills; mathematics.

AB ABSTRACT: Forms 3M and 4M of the Canadian test battery, represent the Metric adaptation or revision of Forms 3 and 4. Content and scoring are nearly identical and the two editions may be used interchangeably in the period of transition. There are six levels of tests designated to correspond roughly to chronological age. Levels facilitate individualized testing of pupils at different levels of development in the same classroom. The level assigned to each pupil should be relevant to his needs, abilities, and stage of development. Achievement test results from the previous year may be used as a partial guide, adding an increment representing the estimated growth for assigning test levels. Therefore, a gradual transition from a graded testing program to an individualized program is accomplished.
